

TOOLS FOR PLANNING THE ENERGY RENOVATION OF PUBLIC BUILDINGS IMPULSE PLUS PROJECT 16th June 2022, online.

One key objective towards the 2050 long-term decarbonisation strategy included in the Climate Target Plan 2030 is **energy renovation of public buildings (ERB)**. In this line, several instruments have been set by the directives under the Clean Energy for All Europeans Package. Also, the Covenant of Mayors sets common guidelines for local authorities to develop their Sustainable Energy (and Climate) Action Plans (SECAPs) including specific energy/cost indicators for Municipal buildings.

However, the weighted annual energy renovation rate is low at some 1%. The main common territorial challenge tackled by IMPULSE is **insufficient capacities of local public administrations to manage integrated, reliable, and cost-effective ERB action plans for their buildings' stock**, responding to the EU Directives and ensuring reliable completion of SECAPs.

IMPULSE's tools, for the development of gradual renovation plans and financial planning for cost-optimal solutions for public building stocks, aim to address such challenges. The typology approach followed, and the highly demanding expertise methods conducted will allow public administrations to take more confident decisions and concentrate their efforts in the actual implementation, saving time and money from pre-feasibility studies.

Date and time: 16th June 2022, 9:30-11:30h (CEST time)

Agenda

9.30 – 9:35	Welcome and opening
9.35 – 9.50	How to approach the planning of energy retrofiting of public buildings using the IMPULSE methodology
	Miriam Navarro, Valencia Institute of Building
9.50 – 10.00	Validation of the IMPULSE methodology through the Energy Renovation of a pilot building in Elche.
	Joaquin Oncina, Elche city
10.00 – 10.30	Presentation of the improved Energy Planning & Financial Schemes tools. How do they work?
	Vera Valero, Valencia Institute of Building
10.30 – 11.10	Results of IMPULSE methodology in 4 new territories (Emilia-Romagna, Koper, Valencia, Western Greece Region)
	Fabrizio Tollari, ART-ER, Emilia Romagna (Italy) Larisa Kunst, Regional Development Centre Koper (Slovenia) Raquel Sánchez, Valencia Climate & Energy Foundation (Spain) Speaker from Western Greece Region (Greece)
11.10 – 11.30	Time for questions
11.30	Closing
